

Investing In The Sun

10 FACTS ABOUT

HOW SOLAR POWER CAN SAVE MONEY

WHY GO SOLAR?

FINANCIAL SAVINGS

COMPLETELY GREEN ENERGY

ENERGY INDEPENDENCE

INCREASED HOME VALUE

Solar power offers several benefits for homeowners and business owners alike

10 Money Saving Facts Of Solar Panels

SHOULD YOU INVEST IN SOLAR NOW?

Yes, solar tech has become really cheap and early adoption is tax incentivized

- Costs are at an all-time low
- Tax incentives only for early adopters
- Energy prices set to soar

CAN WE MOVE TO 100% SOLAR?

The answer is an **emphatic yes**. With the current technology and demand, the world would need **366,375KM2** which is only **0.2%** of the Earth's total land surface.

FUTURE OF SOLAR POWER

BIO-SOLAR CELLS

Cyanobacteria can help collecting solar energy from remote areas

BETTER ELECTRICITY CONVERSION

Scientists are working on technology that can effectively store more energy with fewer losses

FLOATING PANELS

Places lacking the area for solar farms can consider floating panels

SOLAR FROM SPACE

Space Solar Power Systems project is sending panels to outer space and transmit it back to the Earth

BETTER ENERGY STORAGE

With the advent of better battery technology, solar power should be a better option

Solar power is the future of energy and it can spell freedom from expensive and restrictive fossil fuels.

We will live in a better and cleaner planet with **solar power!**
